Architextures Wall

The Modern Evolution

Architextures is the latest large format, contemporary retaining wall from Barkman. It is built to handle the most demanding landscaping challenges, and designed to fit seamlessly into most modern spaces.

Architextures features 5000 psi compressive strength for superior freeze-thaw durability. A solid body, eliminates the need to fill the block core with gravel. An integrated tongue and groove connection, ensure blocks will stay in place and perfect height tolerance, eliminates the need for constant shimming.

Blocks can be installed by hand or with a clamp.

INSTALLATION NOTES

Every bundle of coping units will come with 6 left end coping units, 6 right end coping units and 3 regular coping units which have open ends. Available to order in full pallets only. This product can be mechanically installed. To calculate pieces required, multiply the wall length, in feet, by 0.338. This will give you the number of pieces required per layer.

Then multiply this by the number of layers to determine total quantity required. Please note that 0.338 is the multiplier used for both the standard and coping units. The closed end coping does not have the texture as the face does. For in-depth installation guides for specific products, visit **BarkmanConcrete.com.**
