NEW PRODUCTS

Being at the cutting edge of design and technology means we are continually updating and expanding our product line. Please enjoy our new offerings for 2023:

Hexagon 65mm

Creative opportunities are made possible with our new Hexagon 65mm paver. This product matches well with our Broadway 65mm to make your own unique spaces.

Broadway Contour 100mm

This product is our latest addition to the Broadway family which has the versatility of Broadway with a new, textured face.

StackStone Fire Pit Coping and Liner

Upgrade your fire pit and increase its longevity with our Coping and Liner for our StackStone fire pits.

PAVERS

Whether it is a large or small project, Barkman pavers offer a wide selection of options for your patio, walkway, driveway or parking space. Far from just looks, our pavers offer quality assurance through testing and the use of superior grade materials throughout the manufacturing process. We believe we have a paver for any aspiring design.

Bullnose

DESCRIPTION	UNIT					PALLET					PRICE

Specs: Holland has 10 horizontal layers per pallet and each layer is 9.6 sq. ft per layer.

Notes: Holland pavers can be installed in a running bond or herringbone pattern with border options that can be combined with other pavers. The patterns listed below can also be used on our 8CM Holland paver. To calculate soldier course, multiply lineal footage by 0.7; this will indicate the square footage of Holland required. To calculate sailor course, multiply lineal footage by 0.35, this will indicate the square footage of Holland required. A \$35.00 returnable pallet fee will be charged to any bundle of Holland. Contact your local Barkman sales representative for further details. Special order minimum quantity is 1000 sq ft per size. The Unit of Measure for Holland is Each.

Specs:

Roman 8x4 - 10 horizontal layers per pallet with 9.6 sq. ft per layer

Roman 8x6 - 10 horizontal layers per pallet with 9 sq. ft. per layer

Roman 8x10 - 10 horizontal layers per pallet with 9.44 sq. ft. per layer

Roman 8x12 - 10 horizontal layers per pallet with 11.36 sq. ft. per layer

Notes: Roman pavers are rectangular and come in four sizes on separate pallets. They can be installed using one size only in a running bond or herringbone pattern, or they can be installed by mixing the sizes to create a random pattern. A \$35.00 returnable pallet fee will be charged to any bundle of Roman. Contact your local Barkman sales representative for further details. Special order minimum quantity is 1000 sq ft per size. When installing this product, make sure to include a 2-5mm gap between each unit. This will provide enough room for the jointing sand and make installation easier. The Unit of Measure for Roman is Each.

Paver Material Requirements

1) EXCAVATION DEPTH

MATERIAL	FOR PEDESTRIAN TRAFFIC		FOR LIGHT VEHICULAR TRAFFIC	
	MM	IN	MM	IN
Pavers	60	2.36	60	2.36
Sand	25.4	1	25.4	1
Gravel Base	102-152	4-6	203-305	8-12
Total Excavation Depth	178-229	7-9	279-381	11-15

Gravel base: Use minimum depths in a well-drained area or undisturbed soil. Use maximum depths in poorly drained area or distributed soil. 0.5" less is required to compensate compacting of pavers. If soil is saturated more than 50% of the time, filter fabric and extra base should be used.

When installing thicker pavers add equivalent total excavation depth. Note that not all 60mm pavers are suitable for vehicular traffic.

2) BASE MATERIAL

Granular Base

WIDTH		LENGTH		BASE DEPTH				MATERIAL REQUIRED

Weathered Grey	114277	114279	114281

Notes: Available to order in full pallets. Bridgewood should incorporate a 1/8" to 1/4" (3mm to 6mm) gap between each plank. Plank thicknesses will vary; this is intentional to replicate real planks. Can be laid with all three sizes, or a selection of one or two at any size in a running bond pattern. To achieve the most desired look, Bridgewood is intended to be laid in all three sizes with a 1:1:1 ratio. To calculate number of pieces, Area / 5.17 = how many pieces required. A \$35.00 returnable pallet fee will be charged to any bundle of Bridgewood.

PATTERNS

Pieces per 100 sq. ft.

20 pieces: 17 x 10 = 23% of total area

20 pieces: 24 x 10 = 31% of total area

20 pieces: 35 x 10 = 46% of total area

Notes: Rosetta Belvedere Walls are replicated from real stone moulds. Barkman uses enhanced manufacturing techniques to mitigate any height variation, however, some shimming may be required in installing this product. A pair consists of a layer of 3" wall units and a layer of 6" wall units combined. The Belvedere wall pallet has 3 Pairs which is 3 horizontal layers. The Unit of Measure for Belvedere Wall Coping and Corner pallets is Layer Pair. A Layer Pair consists of a layer of 3" wall units and a layer of 6" wall units combined. The Unit of Measure for Belvedere Coping pallets is Layer, as the coping units are all a consistent height.

Desert Buff	103969	103972	104265
Sierra Grey	103963	103964	104263

Specs:

StackStone Advanced Corner - 3 horizontal layers per pallet

StackStone Standard and Coping- 6 horizontal layers per pallet

Notes: To calculate pieces required, multiply the wall length, in feet, by 1.72. This will give you the number of pieces required per layer. Then multiply this by the number of layers to determine total quantity required. Please note that 1.72 is the multiplier used for both the standard and coping units. It's recommended to go a maximum of 2' height. Minimum inside diameter of 42" (23 pieces). A \$35.00 returnable pallet fee will be charged to any bundle of StackStone.

It's What's Underneath That Counts

Compacted Native Soil Subgrade

Preparation of the native soil subgrade is critical to the performance of an interlocking concrete pavement. Large rocks, roots, organic material and all other debris should be removed from the native soil subgrade and in turn be replaced with the crushed aggregate material that will be used to construct the compacted aggregate base. From there, the soil subgrade should be compacted to a minimum 98% standard Proctor density, with modified Proctor density being the preferred standard to use for vehicular applications. The overall success of an interlocking concrete pavement begins with a native soil subgrade that has been prepared and compacted as per the standards and guidelines set out by the Interlocking Concrete Pavement Institute.

Compacted Aggregate Base Layer

The functionality, lifespan and success of an interlocking concrete pavement application is directly related to the compacted aggregate base installed beneath it. Each unique project requires that a proper base design and materials be determined based upon several different variables. Contact your local Barkman representative for more information.

Screeded Bedding Layer

Like the compacted aggregate base, the screeded bedding layer plays a vital role in the overall performance of an interlocking concrete pavement application. The Interlocking Concrete Pavement Institute states that precast concrete pavers should be installed on top of an uncompacted 25 mm layer of concrete sand (CSA A23.1). For more information on what your commercial project will require, you can get in touch with your local Barkman representative.

The ICPI technical specifications are also great resources for application information. (www.icpi.org)

LANDSCAPE KITS

Landscape kits offer a cost effective way to turn any backyard into something special without custom concrete work. In an afternoon or less, you could build a complete kit from our collection of bars, fire pits and our Quarry Stone Outdoor Kitchens. Modular in design and timeless in their appeal, Barkman kits offer the easy choice to elevate your backyard ambitions.

COLOURS

Sierra Grey/Charcoal Accent

Notes: Quarry Stone Outdoor Kitchen Kits come with Polished Granular Finish Countertop which have an exposed aggregate and smooth finish. Colours may vary between various components. When ordering the Extended Countertop, determine Left or Right unit by imagining standing behind the bar counter looking out towards the extended countertop section. Example: looking to the right side would entail ordering a right unit Extended Countertop. The Quarry Stone Compact Pizza Oven kit is made up of the Pizza Oven unit (Nonno Peppe) and the Quarry Stone Storage Unit that acts as a wood storage. These components are purchased separately. Outdoor kitchen kits produced prior to 2020 contain a wetcast band, which makes these kits 1" shorter than our current ones. These kits won't line up with our latest Quarry Stone Outdoor due to the height difference.

Returnable Pallet

Missing board, but stringers are still intact.

Broken board, but stringers are intact.

Unreturnable Pallet

Stringers have broken ends.

Stringer is broken.

Notes: Only pallets with “Barkman” painted on the side will be received by Barkman. Other brand pallets or pallets without the “Barkman” paint will not be received and no credit will be issued. Barkman will only charge for pallets with the “Barkman” name on the side. Barkman will receive and credit in full returnable Barkman pallets that are in acceptable condition. Barkman works diligently to ensure no broken pallets leave our yard to your location. Should an “unacceptable” pallet be brought to your yard by delivery, please document it before being unloaded and inform Barkman immediately. This will ensure Barkman does not improperly invoice you for faulty product. Contact your nearest drop off yard before drop off to ensure the best possible service.

The Environment

At Barkman we are committed to being good stewards of the planet. Not only are our products excellent choices for people concerned about the environment, we employ environmental best practices throughout our manufacturing and operations whenever possible.

Barkman Warranty

Barkman Concrete warrants the structural integrity of our paving stone, slabs and retaining wall units. For homeowners, we offer a transferable lifetime warranty, where we will replace or repair at our option, without charge any defective product installed and maintained to our guidelines under normal use. Commercial uses have specific warranties as well.

For more information on this and our warranty policy on other product lines, please go to our website at www.barkmanconcrete.com/about/warranty.

Quality and Support Pledge

All Barkman products are guaranteed to meet or exceed the Canadian Standards Association (CSA) standards. We use only superior grade materials and employ stringent quality control measures throughout the manufacturing process to ensure a quality product every time. We also support our products with one of the industry's largest network of dealers and contractors. When you need us, we'll be there to help.

Important: Actual colours may vary per region and production facility. Every effort has been made to ensure accuracy in the colour representations found in our product catalogues. However, due to the natural characteristics of concrete, the manufacturing process and print reproduction, actual colours in the final product may vary from that shown.

How to Order

Ordering Barkman products is as simple as calling or visiting one of our many dealers or contractors. For our convenient dealer locator please visit our website BarkmanConcrete.com/find-a-dealer. Kindly be ready to specify product style and colour choice if required.

If working directly with a contractor, please be sure to specify Barkman products to ensure Barkman quality.

Installation and Project Estimation Support

Barkman provides easy-to-read installation guides that contain simple step-by-step instructions to help make installation a snap. Visit BarkmanConcrete.com/Resources to download a copy. Our website and Barkman App also features a handy product calculator that allows you to easily calculate the quantity of Barkman material and accessories.
