DIRECTIONS FOR USE:

Apply stakes as a nutrient program for healthy tree/shrub development in spring and fall as necessary.

- Insert the stakes at 1 meter intervals where the tree or shrub is actively acquiring nutrients. For trees this at/near the dripline and for smaller shrubs this may be 1m away from the center depending on plant material.
- Insert the stake 5cm below the surface to ensure run-off limited.
- Do not apply in designated "buffer" or "Riparian" zones.
