

2019 PRODUCT DATA

JNILOCK[®]
DESIGNED TO CONNECT.

UNILOCK® QUALITY GUARANTEED

GOOD CLASSIC

Our budget-friendly, Unilock Classic pavers and walls are manufactured to exceed ASTM standards for quality and strength. Available in classic shapes and styles, these products utilize a traditional **product mix of large and small aggregates**, that's consistent from top to bottom, with color mixed throughout.

BETTER ENDURACOLOR™

The refined surface of Unilock Enduracolor products is achieved with a **two step manufacturing process** that combines a base of coarser aggregates for a **stronger foundation**, with concentrated color and **wear-resistant finer aggregates on top**. This process protects the surface from the appearance of fading over time because the top layer prevents large, lighter color aggregates from ever showing through.

BEST ELEGANCE™

Deep, rich colors and a multitude of **unique Reala™ textures** combine to deliver the timeless beauty of Unilock Elegance. From the timeworn look of European cobblestones, to the classic luxury of riven natural stone slabs, our Elegance collection offers styles you can't get anywhere else and thanks to Ultima Concrete, the look you purchase is the look that will last, with up to **4x the strength** of poured in place concrete.

EXCLUSIVE UNILOCK TECHNOLOGIES

REALA™

Ultra realistic textures cast from Natural Stone, brick and historic cobblestones.

ULTIMA™

A proprietary manufacturing process creates pavers with up to four times the strength of poured concrete.

COLORFUSION™

A proprietary technology that disperses color randomly for a natural granite-like appearance.

EASYCLEAN™

Factory sealed to provide integral surface protection from stains

There are two Clean Factors (CF®) to choose from:

CLEAN FACTORS (CF)	CF 90	CF 100
Pavers are pre-sealed at the factory	*	*
Enhanced resistance to weathering	*	*
Reduced dirt absorption	*	**
Stains from leaves, coffee, ketchup, mustard, wine and BBQ oils are easier to remove	*	**

TECHNICAL ADVANTAGES

EasyClean™ Stain Resistance - CF 90

An integral surface protection that allows for easier cleanup of spills when they happen, and before a stain can develop.

ColorFusion™ Technology

A proprietary technology that disperses color randomly for a natural, granite-like appearance.

U-GRIP Base Pad			85.39	1.581	54		9		46	2,500

Notes: **Sold in full bundles only on a refundable skid.** For coping options we recommend LedgeStone (page 38), Universal Coping (page 37) or Natural Stone (page 12). See page 39 for all coping pairs. All measurements are nominal. Any wall over 39" in height may be subject to permit requirements and engineering analysis. Always consult with your local authorities before beginning your project. As a rule of thumb, walls 2' high or less require a shallow excavation; otherwise you will require a deep excavation or the implementation of concrete piers (Sono tubes). This system should only be installed by trained, professional contractors to ensure a safe, consistent, reliable system that will be long-lasting. Contact your Unilock Territory Manager for further information.

Notes: Sold on refundable skid - full bundles only. Rivercrest is recommended for walls under 2ft. Ideal for straight or curved walls, seat walls, pillars, tree rings, planters, firepits and grill islands. Integrated connectors require no pins or clips. Minimum radius using equal amounts of each unit is 1.25m / 4.1ft. Using only unit 1 & 3 a 1.055m / 3.5ft radius can be achieved. Engineering services are available; please contact your Unilock Territory Manager for further information.

Internal Use Only. RVC ON, Jumpers CH

RIVERCREST® WALL

Starting a Wall

Course 1

Straight Wall - Align A-A / B-B

Cluster Set 1 - 70%/30%

Course 2

Curved Wall - Align A-B / B-A

Cluster Set 1 - 70% / 30%

Utilizing the following Cluster Sets will create a wall with a 70% Standard to 30% Jumper ratio, and will use all Standard blocks equally throughout the wall. This will produce a wall with lots of jumpers, and short spans in between. Remember to match side A|A or B|B for straight walls and A/B or B/A for curved walls.

Cluster Set 2 - 60% / 40%

Utilizing the following Cluster Sets will create a wall with a 60% Standard to 40% Jumper ratio, and will use all Standard blocks equally throughout the wall. This will produce a wall with lots of jumpers, and short spans in between. Remember to match side A|A or B|B for straight walls and A/B or B/A for curved walls.

Constructing the Wall

Construct the wall by using a Cluster then Jumper, Cluster, Jumper, Etc., alternating the order of the Cluster Set. It is important make sure you utilize all the Clusters evenly throughout the wall to reduce waste. Add an extra Jumper block between clusters every so often to help randomize the wall.

For more information please consult the Rivercrest installation manual.

HARDSCAPE ACCESSORIES

CLEANERS

PAVER CLEANERS

UNICARE NATURAL STONE ACID CLEAN **NEW!** 1L and 5L

Removal of:

- Cement Staining
- Efflorescence
- Iron Oxide (Rust)
- Cement mortar
- Grout

Note: Never use hydrochloric or sulphuric acid based products. **ONLY FOR ACID RESISTANT NATURAL STONE.** Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS. Coverage: 10-50 M²/L depending on dilution.

UNICARE NATURAL POWER CLEAN **NEW!** 1L and 5L

Removal of:

- Oil & Grease
- Food Stains
- General Dirt & Mud
- Light cement contamination (on acid sensitive surfaces)
- Sap & certain plant stains

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS. For Natural Stone only. Coverage: 10-32 M²/L depending on dilution.

UNICARE BIOCLEAN **NEW!** 1L and 5L

Removal of:

- Black spot algae
- Green algae
- Plant stains from leaves, wood, trees, berries & flowers
- Organic staining from bark & compost
- Colored stains from food spillages, tea, coffee and wine

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS. For Natural Stone only. Coverage: 4-8 M²/L depending on dilution.

GATOR CLEAN PAVER SHAMPOO

Gator Clean Shampoo removes ground-in dirt from the surface of concrete pavers and natural stones. It will make the pavers, patio slabs, walls & natural stones look clean and vibrant. Applying Gator Clean Shampoo before a sealer application will assure you of a deeper penetration into the cleaned surface. 1 gal. covers up to 375 sq. ft. Coverage will depend on joint width and surface porosity. Available in 1 gal. & 5 gal.; 4 units of 1 gal./case, 24 cases/pallet; 48 units of 5 gal./pallet.

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS.

GATOR CLEAN EFFLORESCENCE & SLURRY REMOVER

Gator Efflorescence Cleaner will remove any efflorescence stains trapped in the concrete pavers and natural stone pores. It will make the pavers look more clean and vibrant without discoloring or damaging the paver surface. This efflorescence cleaning is a necessary step before a sealer is applied. The sealer will be able to get a deeper penetration into the now-clean pores. Approximate coverage (diluted) is 200 sq. ft. Available in 1 gal. & 5 gal.; 4 units of 1 gal./case, 24 cases/pallet; 48 units of 5 gal./pallet.

* ALWAYS DILUTE. ALWAYS TEST. Product can discolor pavers. Read directions carefully.

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS.

SEALERS & ADHESIVE

UNICARE NATURAL STONE MATTE SEALER **NEW!** 1L and 5L

For Porous Stones - Natural Stone only

- No change of color
- No surface coating, sheen or shine at all
- Riven Sandstone & Smooth Sandstone

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS. Coverage: 6 M²/L depending on dilution.

CAREFULLY READ ALL INSTRUCTIONS AND SAFETY INFORMATION ON PRODUCT LABEL PRIOR TO APPLICATION. SEE MSDS FOR FURTHER INFORMATION.

SEALERS & ADHESIVE

WATER-BASED SEALERS

UNICARE NATURAL STONE COLOUR ENHANCER SEALER

NEW!

1L and 5L

Color Enhancement For Porous Stones (for Natural Stone only)

- No surface coating, sheen or shine
 - Breathable
 - Lasts several years
 - Easy to apply
- Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS. Coverage: 6 M²/L depending on dilution.

GATOR NATURAL STONE FINISH + COLOR ENHANCER - ZERO GLOSS

Gator Seal for Natural Stone is made of silicone based polymers. This sealer penetrates deep into the natural stone thus reducing the oil and dirt penetration, as well as protecting them from the corrosion of de-icing salt. Approximate coverage 200 - 400 sq. ft. per gallon, depending on stone porosity and other factors. Available in 1 gal. & 5 gal.; 4 units of 1 gal./case, 24 cases/pallet; 48 units of 5 gal./pallet.

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS.

GATOR WET CAST NATURAL LOOK FINISH - ZERO GLOSS

Gator Wet Cast Natural Look Finish - Zero Gloss is made from fluorochemical polymers. This sealer penetrates deep into the Wet Cast products thus reducing the oil and dirt penetration, as well as protecting them from the corrosion of de-icing salt. Water-based, this protector does not release unpleasant fumes, and is environmentally friendly. Approximate coverage 175 sq ft per gallon. Available in 1 gal. & 5 gal.; 4 units of 1 gal./case, 24 cases/pallet; 48 units of 5 gal./pallet.

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS.

SOLVENT-BASED SEALER

WET-CAST SOLVENT LOW GLOSS WITH COLOUR ENHANCER

Gator Seal is a low gloss color enhancer for Wet Cast products is made from acrylic-based polymers. It penetrates deep into the Wet Cast products, thus reducing the oil and dirt penetration, as well as protecting them from the corrosion of de-icing salt. Specifically formulated to be used on unsealed surfaces only. Approximate coverage is 175 sq. ft. Available in 1 gal. & 5 gal.; 4 units of 1 gal./case, 24 cases/pallet; 48 units of 5 gal./pallet. Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS. For outdoor use only.

ADHESIVE

GATOR BLOCK POLYURETHANE XP XTRA PERFORMANCE ADHESIVE

Gator Block XP Adhesive is one of the strongest polyurethane adhesives on the market. It is especially formulated for bonding concrete, natural stones, blocks, bricks and pavers. It is intended to provide a permanent bond to approved materials and can be used on dry or humid surfaces. Approximate coverage 31 ft per 10oz. / 86 ft per 28oz.; 12 units/case in box sizes.

SANDS

UNILOCK KILN-DRIED REGULAR SWEEPING SAND

Kiln dried and angular shaped in order to flow easily and stay in place.
66 lb/ bag 50 Bags/Skid

EUROSTONE BOND - THE COURTSTONE® SAND

FEATURES: Great for cobblestone and natural stone joints up to 1.5". Sets at above 32 F (0 C). Fast setting: Drainage base systems, min. 1 hr. without rain. Non-drainage base systems, min. of 24 hrs. without rain. More rigid and water resistant. Helps prevent weed sprouting, damages caused by insects and erosion due to climatic conditions. In vehicular application stone must interlock or lay in a concrete bed. Beige, Grey, Black and Ivory.
Packaging: 50 lbs (22.7 kg)
56 units per pallet
Pallets can be stored outside if covered.

GATOR AQUA ROCK - FOR PERMEABLE PAVERS

FEATURES: For Residential and Commercial applications. For permeable paver joints. It's ideal for driveways, parking lots, walkways, drainage applications, bedding and jointing material and many more scenarios. Helps prevent erosion due to climatic conditions. Use as bedding and jointing material. Graded to meet ASTM No. 9. High strength granite stone for long-term use. Helps collect roof and surface water run-off. Reduction of storm water rate. Long-term high infiltration performance.
Packaging 50lb bags / 22.7 kg bags
56 units per pallet

GATOR TILE SAND - FOR PORCELAIN TILE

FEATURES: For outdoor porcelain tile joints in Gator Tile Systems. Fast setting: drainage base 1 hr. Sets above 32 F. Ideal for use with porcelain tile installations. 15 year warranty if used with the Gator Tile Systems. Helps prevent weed sprouting, damages caused by insects, erosion due to climatic conditions. Beige, Grey, Black and Ivory.
Packaging 35lb bags / 15.9 kg bags
40 units per package
Pallets can be stored outside if covered.

GATOR DUST

FEATURES: For Residential applications. For natural stone joints 1/2" to 6". It's ideal for pedestrian patios, walkways, pool decks and many more scenarios. Sets above 59 F (15 C). Fast setting min. 24 hrs without rain. Pedestrian application only. Helps prevent weed sprouting, damages caused by insects, erosion due to climatic conditions. Beige and Grey
Packaging 50lb bags / 22.7 kg bags / 70 units per pallet
Pallets can be stored outside if covered.

GATOR SUPER SAND - FOR JOINTS UP TO 1" MAXIMUM

Super Sand is a unique mixture of polymer binders and calibrated sand available in Beige and Grey. The installation of Supersand Bond is almost identical to using regular paver joint sand except for the application of water. Once Supersand Bond sets, it becomes very firm and locks between the paver joints while still retaining flexibility and providing a long lasting, durable jointing material. Supersand Bond is recommended for a variety of uses including pool decks, patios, footpaths, driveways, parking spaces, pavements etc. Setting time - 1 hour; sets above 32° F/0° C.

Approximate Coverage: 60 - 85 sq ft per 50 lb. bag. Available in 50 lb. bags/70 bags/pallet.

Note: Extra care must be exercised when using on Copthorne®, Courtstone®, Richcliff®, Town Hall® and Umbriano® products and is not suitable for use with Il Campo®, Series™ and Unigranite®.

GATOR MAXX SAND - FOR JOINTS UP TO 2" MAXIMUM

Gator Maxx Sand is a unique mixture of polymer binders and calibrated sand available in Beige and Grey. The installation of Gator Maxx Sand is almost identical to using regular paver joint sand except for the application of water. Once Gator Maxx Sand sets, it becomes very firm and locks between the paver joints while still retaining flexibility and providing a long lasting, durable jointing material. Gator Maxx Sand is recommended for a variety of uses including pool decks, patios, footpaths, driveways, parking spaces, pavements etc. Setting time - 15 minutes; sets above 32° F/0° C.

Approximate Coverage: 60 - 85 sq ft per 50 lb. bag. Available in 50 lb. bags/70 bags/pallet.

Note: Extra care must be exercised when using on Copthorne®, Courtstone®, Richcliff®, Town Hall® and Umbriano® products and is not suitable for use with Il Campo®, Series™ and Unigranite®.

SANDS

NEW SAND

GATOR G2 Super Sand (Intelligent Polymeric Sand) - FOR JOINTS UP TO 2" MAXIMUM

FEATURES: Setting time - 15 minutes; sets above 32° F/0° C, can be applied even if rain is expected (min. 1 hr.)
Dust free and haze free. No blower is needed, requires only one watering.

Two colors - Beige and Grey
Packaging 50lb bags / 22.7kg bags; 70 bags/skid

IDEAL FOR:

- Residential applications
- Concrete paver, wet cast products
- Sloping areas, pool surroundings, patios, walkways, driveways and more

NEW SAND

GATOR G2 Maxx Sand (Intelligent Polymeric Sand) - FOR JOINTS UP TO 4" MAXIMUM

FEATURES: Setting time - 15 minutes; sets above 32° F/0° C, can be applied even if rain is expected (min. 1 hr.)
Dust free and haze free. No blower is needed, requires only one watering.

Four colors - Beige, Grey, Black and Ivory.
Packaging - 50lb bags / 22.7 kg bags; 70 bags/skid

IDEAL FOR:

- Residential & Commercial applications
- Concrete paver, wet cast products
- Sloping areas, pool surroundings, patios, walkways, driveways and more

N/R - Not Recommended ✓+ - Recommended with Extra Care (contact your Territory Manager for more information)

✓* - These pavers have a very narrow or slightly angled edge (chamfer) limiting sand penetration in the joint and causing possible weak bonding areas. The life cycle performance could be affected.

IMPORTANT NOTICE

Unilock Polymeric Jointing Sand, cleaners and sealers, must always be applied by a trained and experienced professional. Contact your Unilock Territory Manager for training and the most up-to-date best practices.

NOTICE: Unilock does not accept any responsibility for damage to the surface caused by the improper application and use of Unilock polymeric sand, sealers or cleaners. Unilock will not accept responsibility for alternate suppliers of polymeric sand, jointing sand, cleaners and sealers.

1. **EXTRA CARE** must be exercised when using Polymeric Sand on the following products:

EnduraColor® Courtstone® Copthorne® Richcliff® Town Hall® Umbriano®

Unilock's Polymeric Jointing Sand can be used on these products but the fine polymers and binders in Unilock Polymeric Jointing Sand have a natural tendency to adhere to the surface and therefore extra diligence must be taken to pre-clean the surface prior to "wetting the sand in" and squeegee off the surface post application. Failure to do so will result in a "whitish haze" on the surface that is difficult to remove.

2. **IMPORTANT COMPACTION NOTICE:** Always pre-compact the pavers WITHOUT SAND IN THE JOINTS. This will facilitate proper leveling. Polymeric sand can then be swept into the joints. *Always use a compactor with a protective membrane attached to the bottom of the plate.*

ACCESSORIES

GATOR BASE

FEATURES: For Pedestrian use only. Replaces concrete foundations and is used to replace 6" of crushed stone. The interlocking panels distribute all dynamic and static loads to a very wide area, practically eliminating any pressure on the ground.

GATOR Base is a unique evolution in base technology. Evacuates water through channels along a 1 slope. Manufactured using lightweight high-density polypropylene. Environmentally friendly and 100% recyclable. Extremely durable, will not degrade in the ground. Designed with LOCK-N-GO tongue and groove system. Packaging: 10 units per pack, 12 packs per box, 120 units per pallet

GATOR SPACER

FEATURES: Provides uniform spacing and unparalleled horizontal and vertical stability to the system. GATOR Block Bond XP penetrates into the rivet holes, adhering the Porcelain tile to the GATOR Spacer, then hardens. This allows the tile to minimize any horizontal or vertical movements.

Available in 3 sizes: Joint widths of 1/8", 3/16" & 1/4"
Packaging: 50 units per pack, 12 packs per box, 144 units per pallet

GATOR BASE SCREWS

FEATURES: Fastening Gator Edge with the Gator Base Screw through the Gator Base reinforces the outside perimeter, creating a strong lateral support. Gator Base Screws are a required component on any Gator Base install.

When using any of the Gator edging on the Gator Base, they must be fastened with Gator Screws only. Packaging: 50 units per pack, 20 packs per box

GATOR EDGE RIGID & FLEX

Gator Edge Products are easy to use and quick to install. An excellence choice, it offers great lateral support and makes definition easier for alleys, driveways or sidewalks. They are made with 100% polypropylene or polyethylene for strength and flexibility.

Packaging: 24 pcs/skid, 28 bdl/skid, 1 skid = 5,376 lin.ft.

PAVERSAVER UNI MAT

PAVERSAVER UNI MAT

Universal Design - for use on most compactors

The PaverSaver Uni Mat is made out of a specially formulated urethane rubber. This material is soft enough to protect the paver surface and hard enough to minimally affect travel speed. The universal sizing fits most compactor plates and easily attaches and detaches from the compactor.

Area Square = Length x Width

Area Triangle = 1/2 Base x Height

Calculation charts and formulas are provided as a service by Unilock for estimating material requirements. Unilock will not be held responsible in any way for resulting product overage or shortage.

SEALER BEST PRACTICES

- The paver surface should be **clean** and free from oil, dirt, dust and any loose material. This ensures a uniform result and allows the sealer to better penetrate the surface.
- The pavers should be **free of any visible efflorescence**.
- If pavers have been sealed before, make sure to resealed with compatible product.
- **Surface must be dry** (48 hours without precipitation) and warm to the touch (morning).
- Joint sand must also be dry.
- Make sure lawn sprinklers are shut off.
- Best air temperature is between **50 degrees to 80 degrees** with no rain forecasted for the next 24 hours.
- It is best to apply product under constant weather conditions and use the **same application method from start to finish**.
- The paver joints should be completely filled with dry correctly-graded joint sand. The top level should not exceed the bottom of the chamfer or **1/8" below** the surface on the non-beveled or tumbled paver surface.
- **Always test the product** on a small hidden area to ensure the results will meet your expectations.
- Always show homeowners samples to ensure expectations.

At this point read all sealer instructions and determine the best sealer for your desired goal. Do you want to retain the original look, enhance the color, or stabilize the sand joint?

- **Read application information as each sealer can be applied differently.**
- **Make sure you have the correct equipment based on type of sealer. Solvent based sealers need solvent resistant sprayers, watering cans or paint trays.** Water base sealers can be generally applied using plastic equipment. Example: solvent based sealers come in metal containers and water based sealers come in plastic containers.
- Care should be taken that no excess sealer material is pooled on the surface during application always back roll. When using solvent based sealers make sure roller is solvent resistant or for all paints. Foam rollers work best and are less likely to pull sand from the joints.
- Stabilizing sealers are generally sprayed or flood coated with a watering can, then back rolled.
- Acrylic non-stabilizing sealers can be sprayed, then back rolled or rolled on using a metal paint tray.
- **Send your most experienced worker to do sealing projects.**

POLYSAND BEST PRACTICES

- Ensure that paver surface has **proper drainage runoff** (Min 1" over 8'). Finished paver height should always be higher than grade to allow proper surface drainage.
- **Do not set pavers in limestone screenings.** This product holds moisture and does not meet the gradation, drainage qualities or strength of coarse concrete sand.
- Make sure pavers are **clean of all construction dust.** Residual construction dust will haze pavers!
- **Compact pavers** into setting bed to create proper interlock.
- Read and review all polysand manufactures methods of application. **(Read Directions)**
- **Don't rush polysand installation.**
- **Paver area must be completely dry.**
- Lay bags of polysand over paver area. **Stage bags** in areas of coverage. Example: one bag for 60 square feet.
- **Do not over sweep sand.** Sweep sand back and forth within coverage area to fill paver joints.
- **Compact sand into joints.** This is a must in achieving proper density of the sand joint (repeat 3 times). Compaction is critical to assuring sand strength.
- Do not fill sand above the chamfer of paver. Sand should sit 1/8" below bottom of chamfer.
- Using a fine-bristle broom **remove any excess sand** from the paver surface.
- Using a **leaf blower** remove any sand or binder residue.
- **Review all watering directions (Each manufacture has different watering instructions.) This is VERY IMPORTANT!**
- Always start watering at the **bottom of the slope.**
- Always start watering in **controlled areas** per manufacturers recommendations. Example: complete watering in 200 sq. ft. area then move on to the next 200 sq. ft. and repeat.
- During final watering of poly sand, **clean surface by removing excess water** with leaf blower or squeegee depending on paver surface texture. This will remove any leftover binder residue or sand.
- Final thoughts - Always be aware of the weather when installing poly sand. **(Temperature and setting time ratings differ between products.)**
- Refer to all manufactures websites for installation videos.

IMPORTANT NOTES

UNILOCK PAVER PATTERNS

This Product Data Guide contains an extensive reference to patterns and designs. The purpose of these pattern swatches is to help the designer plan unique and exceptional designs. The percentages of products shown are based on the pattern and not on bundle configurations. In fact, there may be situations in which a pattern has been created with one particular size of stone, but that stone only comes packaged with two other sizes. This means that the designer will have to make adjustments how the other components are used in the overall plan. This is usually accomplished by adding a border or an accent. As a result, overages or shortages may occur in certain patterns. The designer and/or installer of Unilock products accepts all responsibility for design and all associated costs incurred as a result of applying any of Unilock's suggested design patterns in a project. Please plan your project and review your order carefully prior to ordering.

TRANSFERABLE LIFETIME GUARANTEE

Unilock provides a transferable lifetime guarantee on the structural integrity of its paving stones to the original purchaser of the product for residential use. If material installed, using our installation guidelines, proves to be defective, it will be replaced without cost. Color matching cannot be guaranteed, and replacement labor is not included. Proof of purchase is required. Excessive defective material (over the industry accepted normal of 2% for non-tumbled unit pavers) delivered to the purchaser will be replaced free of charge if a written claim is made within 5 days of delivery from the manufacturer. Such claims will not constitute reason for delaying payment. All goods shall be deemed accepted if completely installed. Inspect concrete products prior to opening bundle packaging to ensure that shape and color are as ordered. Unsatisfactory material must be available for inspection by Unilock to entitle the purchaser to any adjustment or credit. Inspect all concrete units during installation and set aside any which are chipped or cracked to use for any cut pieces required. The color of concrete products may vary significantly between production lots. Always install concrete units from several bundles simultaneously to ensure proper distribution of color. Prior to final compaction, inspect installed pavers for good color distribution. Relocate certain pavers, if necessary, to achieve desired color blend.

PRODUCT HANDLING WARNING

Bundle Straps Under Tension - Use extreme caution when removing or handling straps. Always wear gloves, goggles, safety footwear, and protective clothing when removing or handling straps. Failure to do so may result in serious bodily injury or loss of sight. Cut all concrete products only in well ventilated areas. Inhalation of dust is a serious health risk. A "NIOSH" (US) or a "CSA" (CDN) approved respirator, safety goggles, hearing protectors, and gloves must be worn at all times. Always "wet-cut" or "wet grind" concrete products to minimize dust.

Do not stack bundled concrete products higher than 2 bundles high. Contents of the bundle may be unstable and subject to topple when stacked. Always use extreme caution and appropriate equipment when transporting or storing bundled concrete products. Failure to do so may result in serious bodily injury or death. Always obey gross vehicle weight (GVW) loading limitations and regulations.

Hazard Rating: Fire 0, Health 1, Reactivity 0. See MSDS Concrete Masonry (Pavers). Contact Unilock for complete sheet or view safety information at www.unilock.com

Unilock assumes no liability or responsibility for loss or damage, resulting from the improper use or handling of our products, or from failure to follow instructions, warnings, and/or advisories on the product label, and on the MSDS sheet.
