# HOW TO PLANT:

**1**     Set your plant and align in your space properly.

**2**     Dig a hole twice the width of the root ball and a depth to leave 1-2 inches above grade.

**3**     Add any planting amendments and prepare the soil. Remove any packaging and tags from the plant.

**4**     Gently scar and loosen the roots and place in the hole.

**5**     Bring soil up to and cover the root ball of the plant.

**6**     Water in well.

**7**     Finish with mulch and water regularly until established.
